A man may never know the full impact his life has, and this is especially true of a teacher. Roger spent 30+ years as a welding teacher, 20 at his alma mater Istrouma High School before moving to teach at Central High School. He retired from education in 2018, and selflessly came back to substitute in 2020. Roger was a talented craftsman who loved to work with both wood and metal, and passed down his love and skill to many students throughout the years. He loved being outdoors, spending much of his free time fishing or working in his yard, especially tending to his camellia trees. He was a proud father, but nothing made him prouder than being a grandfather to his four grandsons.
